## September 2022

### K-25 History Center Day Trip

We are excited to announce our scheduled tour on September 6th. This museum tells the story of the K-25 facility and its contributions to defense, energy and technology advancements. We will explore the workings of the K-25 plant, meet the people who worked there, and learn about the significant industrial, scientific, and military roles that K-25 played in American history. Sign-up will be required with the community events director.
